

## **REMARKS**

### **Summary of Office Action**

Claims 1-118 are pending.

In the Office Action, the Examiner's requires election of one of the following inventions:

- I. Claims 1-4 drawn to time stamping an 801.22 sequence;
- II. Claims 5-14 drawn to a receiver having a selected correlator;
- III. Claims 15-18 drawn to a signal processing circuit including carrier tracking;
- IV. Claims 19-23 and 24-27 drawn on a communication scheme using the first and second frequencies for use in asset tracking;
- V. Claims 28-34 drawn to an asset identifier; and
- VI. Claims 35-118 drawn to identifying location using TOA data.

### **Applicant's Reply**

Applicants elect Group VI claims 35-118, for continued prosecution in this application, with traverse.

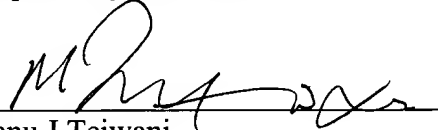

Claims 1-118 all relate to wireless communication networks. The Examiner notes that the identified inventions (Groups I-V) are usable together. For example, use of the Group I invention may involve use of the other identified Groups II-VI. For this very reason, applicants respectfully request that the Examiner should kindly examine all the pending claims together. Applicants respectfully submit examination of all of the pending claims 1-118, which related to wireless communication networks, does not present an undue burden of search on the Examiner.

**Conclusion**

Applicants have elected Group VI claims 35-118 for continued prosecution with traverse. Applicants respectfully request that the Examiner should kindly reconsider and withdraw the restriction requirement.

If there are any outstanding issues to be resolved, applicants respectfully request that the Examiner kindly contact the undersigned attorney by telephone

Respectfully submitted,
